QUO VADIS • Passage In Time (Skyscraper)

Man, is this CD ever a treat for fans of this great Montreal thrash/speed/technical death metal act. Passage In Time is a great compilation of Quo Vadis, from the beginning of the band in 1995 up to their current sound. On this album you get solid live renditions of material ("Dysgenics," "Point of No Return: Mute Requiem"), material from their early demo days ("Sons of Greed," "Vital Signs"), a cool remix ("The Hunted" Hunter/Killer remix), new material ("As One") and even a cool CD-ROM video of "Dysgenics." Quo Vadis are a unique, potent band that have always been cutting edge with what they do. The intensity within them has never really slowed down. Plus, they put on a hell of a live show. If they ever play in your area, stop what you are doing and go crazy in the pit for them. They love that shit! I'm proud of Quo Vadis and the music they play; I always have been. It just goes to show that another great band from Montreal is doing the Canadian metal scene proud. Merci. <A. Bromley> -7-
